REASONS FOR ALLOWANCE

This action is in response to the amendment filed on April 9, 2007. The substitute specification and amended abstract have been entered. Claims 5-7 have been amended and claim 8 has been cancelled. Claims 5-7 are currently pending.

The replacement drawings received on April 9, 2007 are acceptable.

Applicant's arguments appearing on pages 8-9 of the response filed April 9, 2007 with respect to the rejection under 35 U.S.C. § 112, 1st paragraph have been fully considered and are persuasive. The rejection under 35 U.S.C. § 112, 1st paragraph has been withdrawn.

Claims 5-7 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or suggests a device for the optimization of hydraulically controlled engagement of marine transmission clutches including the specified shuttle-type sequence valve and adjusting device arranged together and in combination with the remainder of the structure set forth in claims 5 and 6, and particularly wherein the shuttle-type sequence valve is between the spring element of the adjusting device and one of a supply line of the solenoid valves or the bistable valve, and the bistable valve is linked to a hydraulic control of the sequence valve.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
